

✓ Preparation

- Prepare the formula as indicated, then add **AroMaxx**. It is also possible to first blend the two powder substances and then add water. Or dissolve **AroMaxx** in little water and add to the prepared formula.
- Formulae such as **Silnea^{IBD}**, **EnergeaP** and **EnergeaP Kid** can also be prepared as a soup with **AroMaxx** Tomato-Basil. Put the ready-prepared formula into a saucepan, add **AroMaxx** Tomato-Basil and heat slowly, while constantly stirring, to max. 65 °C.
- Please note: With types Strawberry, Cherry and Lemon protein precipitation may occur, caused by the citric acid contained. This, however, is absolutely harmless.
- Formula prepared with **AroMaxx** is intended for immediate consumption. In case of longer standing time, shake up again or stir before drinking.
