

Product Information

– for professionals only –

Cystin

In Short

- Cystin is a Food for Special Medical Purposes (FSMP) for use in the dietary management of rare metabolic disorders, e.g. Homocystinuria, when supplementation with L-Cystine is indicated
- L-Cystine – in powder form
- suitable for tube feeding
- 100 g tin

Product Profile

Cystin is highly concentrated L-Cystine in powder form.

Cystin is not fortified with micro-nutrients.

Administration

Cystin should be taken along with other food and supplementary to the regular protein supplement – if applicable. Cystin is also suitable for tube feeding.

Preparation

Cystin may be mixed with the protein supplement as needed and taken with it. Stirred into liquids, such as water, (diluted) juice or milk (substitute), it should be drunk quickly. Cystin may also be prepared with fruit puree and other foods permitted within the scope of the respective dietary management.

Always weigh the amount of Cystin needed. Always prepare freshly.

Important Notice Must only be used under medical supervision. Not for use as a sole source of nutrition. For enteral use only. Only for people with rare metabolic disorders, e.g. Homocystinuria. Cystin is not suitable for infants in the first year of life.

Function Cystin is suitable for prevention or correction of disease related L-Cystine deficiencies.

Indication Cystin is suitable for the dietary management of rare metabolic disorders, e.g. Homocystinuria, when supplementation with L-Cystine is indicated.

Dosage The daily dosage depends on age, body weight and individual medical condition, and is, just as the right time for the daily intake, determined under medical supervision.

Cystin can easily be combined with the products of the ZeroMet-system.
