

# Methionin

## In Short

- Methionin is a Food for Special Medical Purposes (FSMP) for use in the dietary management of rare metabolic disorders, e.g. Methionyl-tRNA-Synthetase-Deficiency (MARS1-Deficiency), when supplementation with L-Methionine is indicated
- L-Methionine – in powder form
- suitable for tube feeding
- 100 g tin

## Product Profile

Methionin is highly concentrated L-Methionine in powder form.

Methionin is not fortified with micro-nutrients

## Administration

Methionin should be taken along with other food. Methionin is also suitable for tube feeding.

## Preparation

Methionin may be stirred into liquids, such as water, (diluted) juice or milk, it should be drunk quickly. Methionin may also be prepared with fruit puree and other foods permitted within the scope of the respective dietary management.

Always weigh the amount of Methionin needed. Always prepare freshly.

**Important Notice** Must only be used under medical supervision. Not for use as a sole source of nutrition. For enteral use only. Only for people with rare metabolic disorders, e.g. MARS1-Deficiency. Methionin is not suitable for infants in the first year of life.

---

**Function** Methionin is suitable for prevention or correction of disease related L-Methionine deficiencies.

**Indication** Methionin is used for the dietary management of rare metabolic disorders, e.g. Methionyl-tRNA-Synthetase-Deficiency (MARS1-Deficiency), when supplementation with L-Methionine is indicated.

**Dosage** The daily dosage depends on age, body weight and individual medical condition, and is, just as the right time for the daily intake, determined under medical supervision.

**NUTRITION INFORMATION**
