

Tryptophan

In Short

- Tryptophan is a Food for Special Medical Purposes (FSMP) for use in the dietary management of rare metabolic disorders, e.g. Pyridoxine Dependent Epilepsy (PDE), when supplementation with L-Tryptophan is indicated
- suitable from birth onwards
- L-Tryptophan – in powder form
- neutral in smell and taste
- suitable for tube feeding
- 100 g tin

Product Profile

Tryptophan is highly concentrated L-Tryptophan in powder form.

Tryptophan is not fortified with micro-nutrients.

Administration

Tryptophan should be taken along with other food and supplementary to the regular protein supplement – if applicable.

Tryptophan is also suitable for tube feeding.

Preparation

Tryptophan may be mixed with the protein supplement as needed and taken with it. Stirred into liquids, such as water, (diluted) juice or milk (substitute), it should be drunk quickly. Tryptophan may also be prepared with fruit puree and other foods permitted within the scope of the respective dietary management.

Always weigh the amount of Tryptophan needed. Always prepare freshly.

Important Notice Must only be used under medical supervision. Not for use as a sole source of nutrition. For enteral use only. Only for people of rare metabolic disorders, e.g. PDE. Tryptophan is suitable from birth onwards.

Function Tryptophan is suitable for prevention or correction of disease related L-Tryptophan deficiencies.

Dosage The daily dose depends on age, body weight and individual medical condition, and is, just as the right time for the daily intake, determined under medical supervision.

Tryptophan can easily be combined with SineLys K.
